

GreaseFeast[®] Plus

Aqueous-Based Cleaner / Degreaser and Hydrocarbon Degradator

- ◆ **Extremely Powerful Cleaner**
- ◆ **Environmentally Safe**
- ◆ **Non-Hazardous**
- ◆ **Biodegradable**
- ◆ **Natural Microbes Consume Grease and Oil**

GreaseFeast Plus is a multi-purpose liquid detergent designed for industrial and shop use. It is a unique and effective cleanser that uses the combined actions of powerful, environmentally friendly detergents with naturally occurring bacteria to dissolve and biologically consume grease and oils. Unlike caustic chemicals or dangerous solvents, **GreaseFeast Plus** will not damage metal, plastic parts or electrical insulation. Use it on the toughest grease and heavy oil buildups.

GreaseFeast Plus is:

Effective - A strong biodegradable cleanser that cleans oil, grease and sludge from hard surfaces, including concrete, metals, equipment, wells and pits.

Safe - A non-toxic and pH neutral cleanser that is safe for humans and the environment. The product does not contain dangerous caustic chemicals and will not damage metal or plastic parts.

Versatile - **GreaseFeast Plus** is effective against a wide range of greases, oils and sludge on a variety of surfaces.

Cost Effective - **GreaseFeast Plus** is less expensive than solvent-based cleaners and is concentrated for light to heavy soil removal applications.

How does GreaseFeast Plus work?

GreaseFeast Plus is a special formulation of surfactants, enzymes and microbes that naturally and safely clean away your oil and grease problems. The bacterial soaps (i.e., biosurfactants) in **GreaseFeast Plus** were developed by EnSolve to cut grease and oil away from hard surfaces. Once free of the surface, the microbes in the product actually "eat" the hydrocarbons. The effect is a "one-two punch" that efficiently cleans the toughest grease and sludge residues.

Directions for Use:

GreaseFeast Plus is ready to use 1 to 2 hours after the microbes are added to the container and shaken. The following dilution ratios are recommended guidelines. Actual dilution ratios should be determined in each situation.

Grease/Oil Level	Dilution: (GreaseFeast Plus to Water)
High	Full Strength
Medium	1 pint to 1 gallon *
Low	½ pint to 1 gallon *

* Best results when allowed to soak for at least 10 to 30 minutes.
Heavier soils, at full strength, may require up to 1 hour.

Other Uses:

Machinery leaks and grime - Thoroughly spray machine exterior and if needed, use stiff brush to facilitate removal of oily grime. Rinse thoroughly with clean water.

Parts Washers – Add to washer bath at concentration appropriate for the amount of oil/grease present. Re-charge with half the amount of **GreaseFeast Plus** once per week. It is non-corrosive and will not score or harm metal parts.

Automotive, boats and bicycle parts - Dilute as appropriate, spray on metal or plastic surfaces and let sit for 10 to 30 minutes. In tough grime situations scrubbing may be required. Rinse thoroughly with clean water.

Tile, Concrete and Other Hard Surface Floors - **GreaseFeast Plus** removes dirt and grime from hard surface floors. Use a 10-20% concentration as necessary.

Safety & Handling:

GreaseFeast Plus is a safe and environmentally benign product. As with any cleanser, EnSolve recommends responsible handling when using the product. **GreaseFeast Plus** should not be ingested. Eye protection and gloves should be worn when using any cleaning product. Refer to the MSDS for further information.

The bacteria are safe, non-pathogenic microorganisms that convert oil, grease, transmission fluid, gasoline, fuel and other hydrocarbons into harmless end products. The byproducts of this natural biological process are carbon dioxide (CO₂) and water.

Sizes Available:

GreaseFeast Plus is formulated and packaged for industrial applications. It is available in quart, gallon, 5 gallon and 55 gallon drums. Other quantities are available upon request.
